

With a synergy of passion to become a doctor and a love for serving people have been primary attributes of who I am today. I am a high school senior and plan to pursue a career in medicine. My parent's love and guidance have nurtured me all these years. But it is through God's continual blessings; I receive strength and wisdom to do things today and attempt greater things tomorrow for His glory.

I found an aptitude in Biology which constantly inquires about life. Because of a strong interest in studying human anatomy and a fascination in research breakthroughs, I want to become an adept doctor who serves selflessly — one person at a time. This firm education will empower me with dynamic skills of lasting knowledge and character development — thus making a difference in the world.

Keeping my passion ablaze, I traveled to India to volunteer at Mother Teresa's Orphanage. I cleaned, fed, and played with these lost and forgotten children, bringing them happiness and laughter for a brief moment. I volunteered in Calcutta Mercy Hospital, taking patient rounds with nurses and distributing medicines through mobile clinics. The highlight was observing up-close a cleft lip and palate surgery of a young girl, cementing my dream to be a doctor. Involved in high school service organizations has given me the impetus to demonstrate leadership skills while holding several key leadership positions. I realize that I have the potential to make a difference and positively impact the lives of those in my community.

With an abiding faith and steadfastness, I seek a comprehensive education that will equip me with skills to become a compassionate doctor and a responsible contributor to the world of medicine. 2k4kids Scholarship will be a lasting benefit in completing my education and accomplishing my career goals.
