2K4Kids Scholarship

Hardworking, extremely intelligent, strives to the fullest, and never gives up! These are words that would definitely describe me. My name is Vanessa Krumin and I'm a senior at River Valley High School. I am in the top ten of my senior class and plan to continue my life with excellence.

I strive to be the best that I can be at everything I put my mind and heart to. Although I am a senior and taking four college classes I still maintain to be the best mother I can be to my beautiful baby boy Jadon. Through all the struggles of work, school, and motherhood, I stay strong and demonstrate complete academic excellence. I have a strong desire to accomplish anything I start and also have the ability to juggle many complicated things at once. There is never an obstacle in life that I am not willing to take on. I come from a single parent that did not graduate from high school because of pregnancy and will be the second to graduate from high school and continue high education from a family of seven. I have an ambitious desire to succeed and will go far towards my goals that I set for myself, no matter what my goals are.

Although my life is complicated and hard, I plan to continue my education and become a teacher of secondary education. I am planning to immediately further my education at Northern Arizona University, but I need a lot of financial help. I believe I am very qualified for your scholarship and would truly put it to a good cause and give back to all the children I plan to teach. Thank you very much for all your time and consideration.
